

- **High density dye black inks for better light blocking.**
- **Low cost, clear inks for non-active ink channels.**
- **Screens can be burned longer for better polymer curing.**
- **Faster printing compared to pigment inks.**
- **Increased scratch resistance.**
- **Inks available in cartridges and bulk.**
- **Cost effective, high quality film for both dye and pigment inks.**
- **Bulk ink feed systems available to reduce costs.**

Using an Epson inkjet printer as an image setter to print onto clear film has become the standard method of making screen positives in the screen printing industry. The small dot size that these machines produce, and the ability to print at high resolution provides an ideal way to make high quality color separations at a low cost compared to traditional photo chemistry or thermal print methods. However, the original pigment inks provided by Epson are not ideally suited to the screen positive process, providing poor light blocking performance and they can easily scratch off during the screen exposure process. This has now all changed with the introduction of the i2i Absolute Black ink and film products from Ink2image.

i2i Absolute Black Dye ink

Using specially developed, high density UV absorbing dyes, the i2i Absolute Black ink provides superior light blocking performance. As mentioned above, pigment inkjet inks are not ideally suited to blocking light. The reason for this is that they don't easily 'film form' to provide complete coverage of the printed area. The magnified images on the right show this effect. The pigment black ink has not completely covered the film and holes are visible that can cause 'pin hole' curing in the polymer during the screen exposure process. The i2i Absolute Black ink has completely covered the film with no holes present. This means that screens

can be exposed for longer during the exposure process to provide better polymer curing. The i2i Absolute Black inks also are more scratch resistant and so films can be kept for re-use on print job re-orders. Another draw back of the original pigment ink is that the printer has to print at high resolution (and therefore a slow speed) to lay down a high enough ink coverage for the screen positive making process. The superior film forming and light blocking characteristics of the i2i ink means the printer can now be set to print at a higher speed to increase productivity.

i2i Absolute Black ink is supplied in ready to use cartridges for most Epson wide format printer models. Cartridges are priced at around 25% lower than original cartridges. For single black users, the i2i ink is normally supplied in the photo black cartridge. However, for multiple black users with special RIP software, cartridges are available filled with black ink for any color channel on the printer. For even higher cost savings, Ink2image also provides bulk ink devices and ink in bulk bottles for most Epson wide and small format printer models.

i2i Absolute Black inks work in most Epson desk top printers including the Photo 1400 and Artisan 1430, and in all Epson wide format printer models including the Pro 3800, 3880, 4000, 4800, 4880, 4900, 7600, 7700, 7800, 7880, 7890, 7900, 9600, 9700, 9800, 9880, 9890, and 9900.

i2i Absolute Clear ink

Most Epson printers used for making screen positives only print with the black cartridge, and don't ever use the other full color inks installed in the printer. Unfortunately, Epson printers do require that inks are loaded in all channels on a machine to prevent print head damage, and so these color inks are essentially wasted during head cleaning cycles. Ink2image offers a low cost, clear ink for these redundant ink channels to reduce wasted color ink costs by 50%. The i2i clear ink is freely mixable with the original inks and will keep the print head working correctly should the machine ever be required for full color printing in the future. Clear ink is supplied in cartridges for wide format models, or in bulk for use in our range of bulk ink devices.

i2i Absolute Film for Screen Positives

A high quality, 5 mil, water resistant film specially developed for screen positive production. The ink receptive coating provides excellent dot gain, exceptionally high D-Max and very good scratch resistance. Developed specifically for use with the i2i Absolute Black ink, the i2i film also works well with other pigment and dye inks. i2i Absolute film is supplied at a very competitive price and is available in all popular cut sheet and roll sizes.

i2i bulk ink systems for Epson printers

Ink2image provides a host of bulk ink devices for most models of Epson wide format and small format printers. Combined with the i2i Absolute Black and Clear inks in bulk, our bulk ink devices save upward of 70% compared to using original cartridges, and provide a truly cost effective method of printing screen positives.

For Epson small format machines, such as the popular 13" wide Photo 1400, Ink2image provides our innovative Trio bulk ink device that consists of refillable ink tanks that fit into sleeve adapters in the printer. These tanks are manually refilled from bulk ink bottles as they run empty and are ideal for the small to medium print volume user. For larger print volume customers, the Ink2image bulk ink feed system provides a more automated filling process with large volume reservoirs beside the printer feeding the print heads via flexible tubing.

For Epson wide format printer customers, Ink2image provides refillable cartridges that fit in the printer just like standard cartridges, but can be refilled from bulk ink bottles via a filling hole in the top of the cartridge. The cartridges are translucent so ink levels can be easily monitored. Resetting of the cartridge chips is handled by a simple hand held chip resetter that resets the chips back to full each time they are refilled.

i2i Cleaning Cartridges and Dead Head Cleaning Fluid

The i2i Absolute Black ink is normally mixable with other dye based black inks without issue, and can be installed directly on top of Epson pigment blacks, although we recommend a purge through of the black ink to ensure you are not printing with a mixture of blacks. The Absolute Black can also be installed in brand new printers that have not been loaded with pigment inks, and can be run alongside regular color inks for customers who want to print both full color images as well as screen positives, as long as the printing software used allows this. However, for customers who are currently running pigment based inks such as Epson Ultrachrome or Ultrachrome K3 and want to run the Absolute Black in every cartridge, it is strongly recommended that the printer is flushed out before installing the i2i black. The Epson color pigment inks and Absolute Black ink don't mix well together and machine reliability issues can occur without flushing. Ink2image provides low cost cleaning cartridges that contain our renowned Dead Head cleaning fluid for this purpose (bulk ink users can buy the same fluid in bulk). Flushing a printer is simply a matter of performing an 'initial fill' routine (instructions provided) with cleaning cartridges installed prior to installing the i2i Absolute Black ink. Although flushing a printer adds to the changeover cost of converting to the i2i ink, this initial cost is minimal. With Epson desk top printers, no flushing is required as the i2i Absolute black ink can be quickly purged through the print head by running a few cleaning cycles.

i2i Absolute Black Dye Ink For Screen Positives - A special high strength dye based black ink with excellent UV blocking properties for the printing of screen positives. For use in all Epson printers. Machines that have previously been running pigment ink need to be flushed out with cleaning cartridges before installing this ink.

Item #	Description	Retail Price
ABK-B04-K	i2i Absolute Black Dye ink for Screen positives - 4 oz Bottle	\$ 25.00
ABK-B08-K	i2i Absolute Black Dye ink for Screen positives - 8 oz Bottle	\$ 47.50
ABK-B16-K	i2i Absolute Black Dye ink for Screen positives - 16 oz Bottle	\$ 89.00
ABK-B32-K	i2i Absolute Black Dye ink for Screen positives - 32 oz Bottle	\$ 150.00

i2i Absolute Clear Ink For Screen Positives - A clear ink for use in non-active channels on printers where only black ink is used for printing. This clear ink mixes freely with dye and pigment inks, and offers considerable savings compared to wasting normal inks in the non-active heads of a printer.

Item #	Description	Retail Price
ABCL-B04-CL	i2i Absolute Clear ink for Screen positives - 4 oz Bottle	\$ 15.00
ABCL-B08-CL	i2i Absolute Clear ink for Screen positives - 8 oz Bottle	\$ 27.00
ABCL-B16-CL	i2i Absolute Clear ink for Screen positives - 16 oz Bottle	\$ 49.00
ABCL-B32-CL	i2i Absolute Clear ink for Screen positives - 32 oz Bottle	\$ 88.00

i2i Absolute Black Dye Ink Cartridges For Wide Format Printers - Cartridges for Epson and Roland/Mutoh/Mimaki wide format printers filled with the i2i Absolute Black ink for making Screen positives. Normally, the black ink is only used in the Photo Black channel on a printer. Ink2image also offers the Absolute Black ink filled into any color cartridge for printer set ups where black is run in any color channel for control by a RIP. Please note: the Absolute Black ink is not mixable with the original pigment inks and so cleaning cartridges should be used to flush out the machine before installation of this ink. However, brand new printers that have not had the original inks installed can be set up with Absolute black without flushing first.

Item #	Description	Retail Price
E3ABK(C,M,Y,K)	110 ml capacity cartridge for the Epson Stylus 3000 filled with i2i Absolute Black Dye ink	\$ 35.00
E96ABK(C,M,Y,PK,MK,LK,LC,LM)	220 ml capacity cartridge for the Epson Pro 4000, 7600, and 9600 filled with i2i Absolute Black Dye ink	\$ 65.00

E9880ABK(C,M,Y,PK,MK,LK,LK,LC,LM)	220 ml capacity cartridge for the Epson Pro 7880 and 9880 filled with i2i Absolute Black Dye ink	\$ 65.00
E9900ABK(C,M,Y,PK,MK,LK,LK,LC,LM,O,G).350	350 ml capacity cartridge for the Epson Pro 7700, 7890, 7900, 9700, 9890, and 9900 filled with i2i Absolute Black Dye ink	\$ 99.00
G9ABK(C,M,Y,K,LC,LM)	220 ml capacity cartridge for Roland/Mutoh/Mimaki aqueous printers filled with i2i Absolute Black Dye ink	\$ 65.00

i2i Absolute Clear Ink Cartridges For Wide Format Printers - Cartridges for Epson and Roland/Mutoh/Mimaki wide format printers filled with the i2i Absolute Clear ink for non-active channels when making Screen positives. This clear ink mixes freely with dye and pigment inks, and offers considerable savings compared to wasting normal inks in the non-used heads of a printer. Absolute clear inks contain the necessary resins and humectants to keep the print heads in perfect working order should they ever need to be used again with normal inks.

Individual Cleaning Cartridges for Wide Format Printers - Ready to use, compatible cartridges filled with our powerful Dead Head Cleaning solution. Monitor chips are fitted where required. Cleaning cartridges are used to flush out a printer when changing from one ink type to another, or when a machine is not going to be used for an extended period to stop ink from drying out in the print head. They are also a useful service aid to help unblock clogged jets.
